DESCRIPTION

Margarete has a lot to offer!!!!

Margarete is an innovative residential project named after the place where it was built: the fifth district of Margareten in Vienna. In the attic of a Gründerzeit house built in 1893, 8 new apartments are being built on two levels in lightweight construction according to current plans that have already been approved for construction.

All residential units have open spaces in the form of terraces and are flooded with light, bright and friendly due to the large skylights and vertical windows with triple insulated glazing.

The skylights with awnings also meet the most modern living standards.

Heating and cooling are provided energy-efficiently by a heat pump and underfloor heating.

The apartments are generally handed over ready for occupancy. At the request of the buyer, a turnkey handover is possible for an additional charge.

Highlights:

8 attic apartments

all with terraces

1 - 4 rooms

33 - 157 m² living space

Cooling & heating with heat pump

Excellent infrastructure and public connection to U 2 directly in front of the door from 2028.

For equipment details, please refer to the construction and equipment description.

In the course of the attic conversion, an elevator will also be installed over all floors.

Take advantage of the opportunity available now at the start of the project to create your floor plan optimized for your personal needs within the framework of the static and building code conditions.
